Novelties

New Bedding Petunia SUNRISE

Developed by Rutan Bros., New Market, N. J.

SPECIMEN PLANT IN 5" POT

SUNRISE was awarded "Special Merit" rating in the New York Florist Club variety test at the New Jersey Experiment Station and given an Award of Merit as a pot plant by the New Jersey Florist Association.

"All the world has been waiting for SUNRISE" is an exaggeration but the search has been world-wide for a compact yet vigorous, brilliant pink bedding Petunia.

SUNRISE answers these qualifications better than any we know. The growth is very compact and branching, attaining at maturity a height of 10-12" and a spread of 15-18". At no time does the plant become "leggy" but always presents a solid mass of deep green foliage studded with blooms.

The 2" flowers have slightly frilled edges and are brilliant rose with a flush of scarlet radiating from a small yellow throat, a combination that glows in the sunlight.

SUNRISE is excellent to use as a pot plant in early Spring and will sell readily in competition with the more difficult large flowered sorts.

Tr. Pkt. 75c, 1/16 Oz. \$1.50, 1/8 Oz. \$2.75, 1/4 Oz. \$5.00,
1/2 Oz. \$8.00, Oz. \$15.00

PETUNIA HYBRIDA GRAND. CRINKLES, (Rutan Bros.) Award of Merit N. J. Florist Association.

The sophisticated sister of Sunrise. The plants are of compact dwarf growth approximately 12-15" high at maturity and the large deeply fringed flowers are the same bright rose with an even more intense scarlet suffusion and veining. An occasional flower will be blotched with white which makes it even more interesting.

Tr. Pkt. \$1.00, 1/64 Oz. \$2.75, 1/32 Oz. \$5.00

Improved Extra Large Flowered Morning Glory

These have been grown for many years in Japan as a pot plant. The immense 6-8 inch flowers are very striking and a well grown pot plant should sell readily as a novelty item.

The Japanese method is to sow in April, shifting approximately every four weeks into larger pots with fertile soil. The runners are kept pinched so that the plants stay compact. The natural blooming time is in August and September, but this no doubt could be prolonged by later sowing and the use of light.

Forcing Stocks

Seed of Stock for forcing has always been more or less unpredictable with regard to the percentage of doubles it will produce. Selection of the strongest plants, growing in rich soil and proper feeding has been standard practice, but even under these conditions sometimes the percentage of doubles is too low for profit. To use all possible safeguards, our grower plants a quantity of each lot of seed and any lot that does not prove up to standard, is discarded.

Careful comparative tests have proved that our strains are equal to the best available and we feel convinced that we can satisfy the most critical.

STOCK COLUMN

MAMMOTH FLOWERED COLUMN

Three New Colors

Pink. A soft Chatenay pink that is so useful for cut flower purposes. A really fine introduction.

Lavender. Several shades deeper than Silver Lilac but the individual flowers are almost one half again as large. A fine sort.

Salmon Rose. We have used this name as best describing the color of this new development. The flowers as they first open are a soft salmon yellow with a suffusion of old rose which intensifies as the flower ages. The immense size of the double blooms and the unusual color make this a variety that will create attention wherever shown.

Any of the above three new colors, 1/2 Pkt. \$0.60; Tr. Pkt. \$1.00. 1/4 Oz. \$3.00. Collection Tr. Pkt. of each color \$2.50.

Our stock seed is proven for percentage of doubles

Lawn Grass Seed

Good seeds are cheap at any price and nowhere does this hold good as much as with grass seeds. The various mixtures we offer have been proven over a long period of years. Price differences are largely due to the various types and species used in compounding the mixtures and each will be found to be of highest germinating power and free of weed seeds.

SUPERFINE EVERGREEN MIXTURE:

This is indeed a superfine lawn mixture including mixed Bents and White Clover. The fine grasses included in this mixture germinate and develop slowly but produce a beautiful permanent lawn when conditions are favorable.

Roses

We recommend planting dormant roses in the Fall and very early Spring. Experience has shown that results with dormant plants are very uncertain after April 1st, and for that reason we offer potted roses only in our Spring list. Prices on this type of material are naturally higher but results are so superior, there is no question of value, because the element of loss and complaint is practically eliminated.

Important

PATENTED PLANTS—All patented plants offered in this catalog are sold by us under License from the Patent owners, and it is understood and agreed to by the purchaser that they are for resale at retail only. The asexual reproduction of patented plants is reserved by the Patentees and is strictly prohibited under provisions of the Plant Patent Act.

Purchasers of Patented and Nationally advertised roses shall not list or sell them at less than the established price for the current season, and not less than three of a kind at the dozen rate. Nor include them in any collection offers, except in connection with other patented roses. Neither shall they be featured in any manner or form as a premium. Failure to comply with this policy will result in discontinuance of the supply.

Hardy Perennials and Rock Plants

Interest in hardy perennials is constantly increasing. Garden magazines and Garden Clubs are spreading the knowledge of the choicer items. The reasonable price at which most plants are sold is also a big factor in creating a demand that means profit to you.

Many items are valuable cut flowers and they usually bloom at a time when greenhouse material is scarce. A planting of cut flower items will repay many times its original cost, with the natural increase available for resale.

PRICES: 1-3 of a variety at the each rate which is 5c added to the 100 rate. 4-24 plants at dozen rate. 25 or more at 100 rate.

It is true, regardless of poor business conditions, lack of demand, over supply and other unfavorable factors that there is a constant demand for superior quality and novelties. We are fortunate, as a business, that reader interest forces magazines, newspapers and periodicals to print page after page of plant and flower articles.

Many of these articles are devoted to the new or outstanding items and all of us have had experience of their pulling power by the inquiries we have received.

The time tested favorites must always be our butter and bread sorts, but it is well to consider this demand for the new and novel. This holds for the cut flower specialist as well as the florist or nurseryman selling a general line of flowers and plants.

It is impossible to mention here, all the worthwhile items on the preceding pages, but we have tried to make our descriptions clear and truthful and hope you will not hesitate to call on us for any information regarding specific items.

Try some of the new things or some of the old in new ways and you are sure to profit.

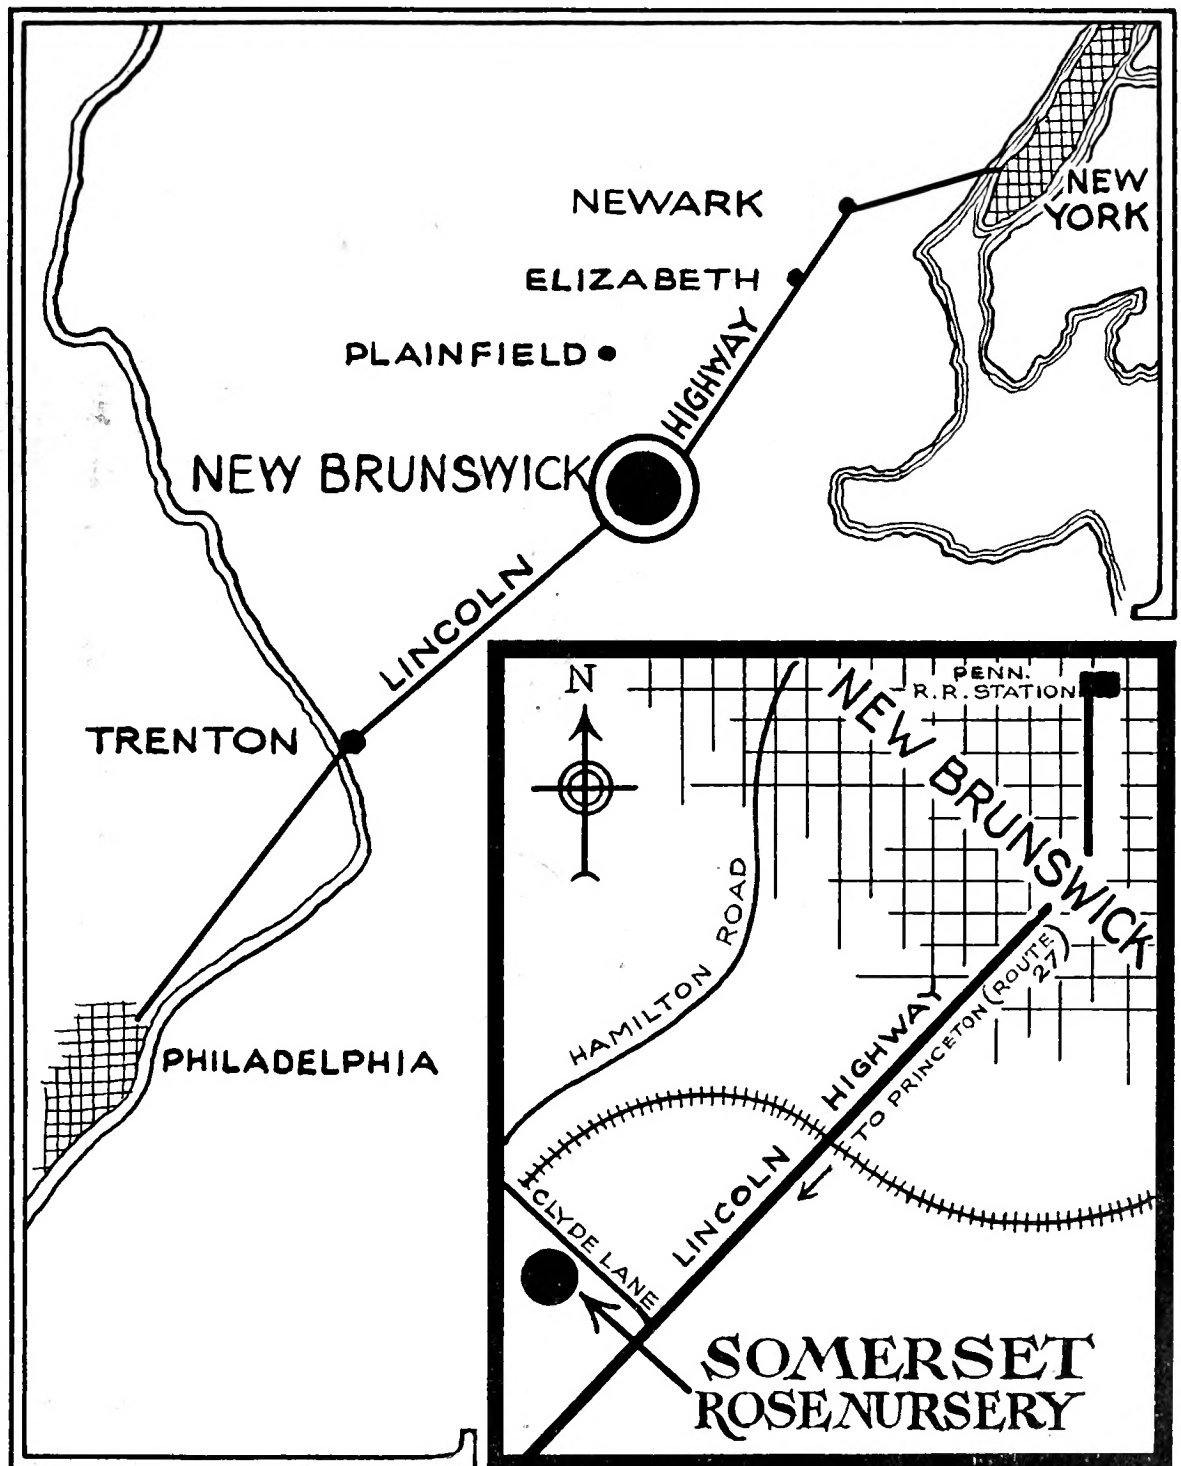

You Are Welcome

to visit us at any time. Plan to stop by on your way to the World Fair.

We shall be glad to meet you personally and there is always something of interest in bloom.

Look for the small white and black sign.
